## Tapered Column Wraps

The four-piece Tapered Column Wrap was developed to add craftsman aesthetic in an easy to install design. Eliminate the calculations and precise cutting that typically requires skilled labor to ensure proper angles for a tapered column to properly fit together. The design of this Tapered column with four pre-cut panels that utilize friction-fit miter lock joints, simply connect together for a seamless finish. Each Tapered Column comes with squaring corners and decorative skirt pieces that fit together to allow for additional detail that emphasizes the craftsman aesthetic. Covering a structural post has never been easier!

## AZEK Exteriors Advantages

### Resistant to Moisture

AZEK Trim has a higher resistance to moisture absorption than wood, engineered wood, and wood composite products, which eliminates swelling, distortion, and warping.

### Resistant to Mold

AZEK Trim is more mold-resistant than most other trim substrates after prolonged water contact.

### Weathers Better

AZEK Trim resists the damaging effects of UV exposure better than many other trim substrates, maintaining its brilliant white color without cracking, splitting, or fading.

### Lightweight and Flexible

AZEK PVC Trim is significantly lighter and more flexible than many alternative (non-PVC) substrates, making it easier to carry, handle, and install.

### Fewer Installation Restrictions

Trim products can be installed in/around water, and can have grade contact, so there are fewer clearance and other requirements.

### Efficient Fastening

Finish AZEK Trim without pre-drilling; fasten the boards close to the edge without risk of splitting or mushrooming – saving time on the jobsite.
